Deskripsi Singkat MK	The MBKM (Merdeka Belajar Kampus Merdeka) BKP Program Planning course is a course designed to equip students with skills in planning and managing activity programs related to independent and collaborative learning. This course aims to develop students' abilities in compiling programs that are oriented towards real results, connecting theory with practice, and encouraging active participation in the world of work, industry, and social projects. Through this course, students are taught to understand various important aspects of program planning, including identifying needs, managing resources, determining specific and measurable goals, and evaluating program success. During this course, students will gain direct experience in compiling and presenting programs that are relevant to their fields of study or interests in a series of BKP (Learning Activity Forms) activities offered by MBKM. They will be encouraged to work collaboratively, use innovative approaches, and apply project management methods in every stage of planning. The MBKM BKP Planning Program also emphasizes the importance of collaboration with external partners such as industry, non-profit organizations, or government to increase the relevance and impact of the designed program. This course forms a strong foundation for students in designing programs that support continuous learning and active contribution to community development.
