Deskripsi Singkat MK	The Student Teaching Internship - Instructional Material Development course is designed to equip students with the knowledge and skills to design, develop, and evaluate effective and appropriate teaching materials for learning needs. Students will learn the principles of developing teaching materials that are relevant to the curriculum, target learners, and educational context. This course also covers various media and formats of teaching materials, such as print, digital, and multimedia materials, which are designed to increase student engagement and understanding. In addition, this course encourages students to develop creativity and innovation in designing teaching materials that are interesting, interactive, and support the achievement of learning objectives. Students will be trained to evaluate the effectiveness of teaching materials based on pedagogical and didactic criteria, and consider the suitability of the content to the characteristics of the students. At the end of the course, students are expected to be able to produce teaching materials that are not only informative, but also able to support meaningful and contextual learning experiences for students.
