Deskripsi Singkat MK	The Philosophy of Non-Formal Education (NFE) course provides an in-depth understanding of the philosophical foundations of non-formal education, including values, principles, and its role in individual empowerment and social transformation. Students will explore philosophical concepts such as epistemology, ontology, and axiology, and their relevance in non-formal education. This course also discusses the relationship between non-formal education and formal and informal systems, and its contribution to inclusive and sustainable community development. With a critical approach, students are expected to be able to design and evaluate non-formal education programs that have a positive impact.
