Deskripsi Singkat MK	The final thesis assignment course is a course aimed at making students understand and able to apply basic research concepts. In this final assignment, students are directed to prepare a research proposal by examining a problem (background), identifying the problem, problem limitations, problem formulation and research objectives. Then proceed with a literature review, conceptual framework for thinking, and preparation of temporary hypotheses. Next, data collection and technical data analysis are carried out which are adjusted to the determined problem formulation. As a result, data analysis will be carried out, providing an explanation of the results of data analysis, making conclusions and compiling a research report according to correct writing techniques and free from plagiarism. After passing plagiarism, students are scheduled to conduct a thesis examination session by the examining lecturer before being declared a graduate. By completing a thesis, students demonstrate their ability to conduct structured and scientific research, and are ready to face professional challenges in their field.
